

Feedback...

Great feedback from students on placements and new starters in the Haematology clinical areas...

'I was involved in lots of new experiences'

'I learned a lot about medicines management such as controlled drugs and anti-emetics'

'Weekly teaching sessions are very useful'.

CENTRE OF CLINICAL HAEMATOLOGY AT NOTTINGHAMSHIRE UNIVERSITY HOSPITALS

CITY CAMPUS

Come and work at the Clinical Haematology unit, City Campus

There are many opportunities available to work within the Clinical Haematology unit to suit your individual needs, including:

- Fletcher ward (BMT Unit) including the James Skillington Adolescent Unit
- Toghill ward (general haematology ward)
- Haematology Day Case

Please ask us about the latest rotational opportunities...

Why come and work in Haematology?

Nationally recognized Haematology Transplant Unit...

You will be fully supported by three Clinical Educators who work within the Clinical Haematology Unit.

You will get...

- Four weeks supernumerary
- Local inductions
- Support clinically on the wards, Practical support to make you IV/ Chemotherapy competent, insight visits with the haematology specialist nurses
- Opportunity to attend the Haematology study days

Continuing Professional Development is encouraged and supported where funding allows, there are opportunities for you to complete the Mentor's course, University modules and externally organised study days.

There are various Link Nurse roles to get involved with including: Infection Control, Tissue Viability and Nutrition.
