

Ward Feedback

“ I was student nurse on Gillies ward and enjoyed working with the team, they provided great support and I learnt a lot”

“ The care I have received during my stay on Gillies ward has been fantastic”

“Great experience as a student nurse to get the opportunity to experience 3 specialties on 1 ward”

Female Urology, Breast, Plastics

Gillies Ward

Come and join Gillies Ward which is a 23 bed, 3 specialities surgical ward for female Urology, Breast and Plastics Patients.

We take elective admission, GP admissions and ED admissions.

What we Offer?

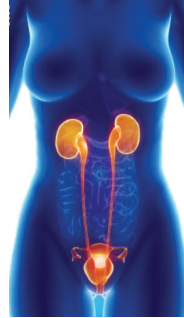

We are a very welcoming, supportive committed nursing team. New starters have a varied and comprehensive induction to all 3 of our specialties and this includes theatres, dressings clinic, pre-op assessment, stoma nurses, urology centre and the breast institute.

Gillies ward offers the opportunity to develop acute surgical knowledge and gain experience of emergency triage care in all our specialties. We nurse a diverse range of patients and provide excellent nursing care to all.

Newly qualified staff nurses are offered a fully supported preceptorship programme which includes the Acute Care Skills course and a supernumerary period on the ward whilst being fully supported and guided by experienced staff.

Urology

Gillies Ward nurses both female surgical and elective urology patients and also triages and treats urology Emergencies.

Plastics

Gillies Ward also nurses plastic surgery female patients for both elective surgery and emergency surgical patients. Gillies ward triages plastic hand trauma as well as cancer and non cancer surgeries.

Breast

NUH has the Nottingham Breast Institute on site, Gillies Ward works very closely with the institute and treats female patients with breast cancers as well as non malignant breast problems and breast reconstruction surgery.

Gillies Dressing Clinic

We have a nurse led dressing clinic that arranges and sees complex plastic surgery wounds and reviews all male and female hand trauma patients, clinic works very closely with ANP's, physios providing patients with long term recovery programs.
